Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

The Journal of Geology is published semi-quarterly. ¶The subscription price is $3.00 per year; the price of single copies is 50 cents. ¶Postage is prepaid by the publishers on all orders from the United States, Mexico, Cuba, Porto Rico, Panama Canal Zone, Republic of Panama, Hawaiian Islands, Philippine Islands, Guam, Tutuila (Samoa), Shanghai. ¶Postage is charged extra as follows: For Canada, 30 cents on annual subscriptions (total $3.30), on single copies, 4 cents (total 54 cents); for all other countries in the Postal Union, 89 cents on annual subscriptions (total $3.89), on single copies, 10 cents (total 60 cents). ¶Remittances should be made payable to The University of Chicago Press and should be in Chicago or New York exchange, postal or express money order. If local check is used, 10 cents should be added for collection.

William Wesley & Son, 28 Essex Street, Strand, London, are recognized as European agents and are authorized to quote the following prices: Yearly subscriptions, including postage, 16*s.* each; single copies, including postage, 2*s.* 6*d.* each.

Claims for missing numbers should be made within the month following the regular month of publication. The publishers expect to supply missing numbers free only when they have been lost in transit.

Business correspondence should be addressed to The University of Chicago Press, Chicago, Ill.

Communications for the editors should be addressed to them at The University of Chicago, Chicago, Ill.

Contributors are requested to write scientific and proper names with particular care and in citations to follow the form shown in the pages of the Journal.

Separates, if desired, must be ordered in advance of publication. Separates of leading articles will be printed as ordered, of which 50 (without covers) will be furnished *gratis*, the actual cost of the remainder (and covers, if desired) to be paid for by the author. The table below shows the *approximate* cost of separates consisting of plain text or text with line engravings. The actual cost may vary from the figures given, and will depend upon the amount of work in re-making the pages into forms, press work, paper, binding, etc. Separates containing half-tones may be expected to cost somewhat more than the rates given, the increase depending upon the number of cuts and the amount of work required upon them.

Number of copies	50	100	150	200
Letter-press, for 4 pages or less	$1.30	$1.60	$1.80	$2.00
Letter-press, for 8 pages or less	1.80	2.20	2.50	2.80
Letter-press, for 16 pages or less	3.20	4.00	4.65	5.30
Single plates (1 double=2 single)	.80	1.10	1.35	1.60
Covers, with title (paper like Journal cover) .	1.20	1.69	2.00	2.40

Entered March 20, 1893, at the Post-Office at Chicago, Ill., as second-class matter, under Act of Congress, March 3, 1879.

PUBLICATIONS IN THE

PHYSICAL SCIENCES

Astronomy and Astrophysics

The Study of Stellar Evolution: A Popular Account of Modern Methods of Astrophysical Research. By GEORGE E. HALE. 8vo, cloth. [In preparation.]

Tells how the origin, development, and decay of celestial bodies are studied in a modern observatory. The explanations of instruments and methods are accompanied by illustrations, and the most recent photographs obtained with the telescopes of the Yerkes Observatory are reproduced in a series of plates.

General Catalogue of Double Stars. By SHERBURNE W. BURNHAM. With illustrations. xxxii+296 pp., 4to, cloth; net, $4.00; postpaid, $4.32.

Measures of Double Stars Made with the Forty-Inch Refractor of the Yerkes Observatory in 1900 and 1901. By SHERBURNE W. BURNHAM. 76 pp., 4to, paper; net, $1.00; postpaid, $1.05.

Micrometrical Observations of Eros Made with the Forty-Inch Refractor of the Yerkes Observatory during the Opposition of 1900 and 1901. By EDWARD E. BARNARD. 40 pp., 4to, paper; net, 50 cents; postpaid, 53 cents.

Astronomical Photography with the Forty-Inch Refractor and the Two-Foot Reflector of the Yerkes Observatory. By GEORGE W. RITCHEY. With 29 plates. 12 pp., 4to, paper; net, 75 cents; postpaid, 80 cents.

"Die Bilder der Nebelflecke gewähren einen äusserst plastischen Eindruck."—*Technische Literatur.*

Radial Velocities of Twenty Stars Having Spectra of the Orion Type. By EDWIN B. FROST AND WALTER S. ADAMS. With 3 plates. 108 pp., 4to, paper; net, $1.50; postpaid, $1.59.

On the Spectra of Stars of Secchi's Fourth Type. By GEORGE E. HALE, FERDINAND ELLERMAN, and JOHN A. PARKHURST. With 11 plates. 136 pp., 4to, paper; net, $2.00; postpaid, $2.11.

The Rumford Spectroheliograph of the Yerkes Observatory. By GEORGE E. HALE and FERDINAND ELLERMAN. With 26 plates. 18 pp., 4to, paper; net, 75 cents; postpaid, 81 cents.

The Spectrum of the High Potential Discharge between Metallic Electrodes in Liquids and in Gases of High Pressure. By GEORGE E. HALE and MORTON A. KENT. With 23 plates. 66 pp., 4to, paper; net, 75 cents; postpaid, 81 cents.

Geology

Quantitative Classification of Igneous Rocks. By WHITMAN CROSS, JOSEPH IDDINGS, LOUIS V. PIRSSON, and HENRY S. WASHINGTON. 286 pp., 8vo, cloth; net, $1.75; postpaid, $1.91.

"The publication of this work by four of the leading petrographers of America marks a distinct epoch in the study of igneous rocks and the handling of chemical analyses in petrographic investigations."—*American Chemical Journal.*

"An important work."—*Journal of American Chemical Society.*

Glacial Studies in Greenland. By THOMAS C. CHAMBERLIN. 8vo, cloth. [In preparation.]

Physics and Chemistry

Light Waves and Their Uses. By ALBERT A. MICHELSON. With 108 drawings and 3 colored plates. 174 pp., 8vo, cloth; net, $2.00; postpaid, $2.13.

"The presentation is so skilfully managed that the book can scarcely fail to hold the interest of the general reader, while at the same time physicists and astronomers will find in it much valuable information."—*American Journal of Science.*

Physical Chemistry in the Service of the Sciences. By JACOBUS H. VAN 'T HOFF. Translated by ALEXANDER SMITH. With illustrations. xviii+126 pp., 8vo, cloth; net, $1.50; postpaid, $1.62.

"The volume is an unusually elegant one, which makes a strong appeal to the book-lover as well as to the chemist."—*Journal of American Chemical Society.*

"Lucid, terse, concentrated."—*Knowledge and Scientific News* (London).

"Die Uebersetzung ist ausgezeichnet."—*Zeitschrift für physikalische Chemie.*

The Rôle of Diffusion and Osmotic Pressure in Plants. By BURTON E. LIVINGSTON. xiv+150 pp., 8vo, cloth; net, $1.50; postpaid, $1.62.

"An excellent and much-needed general treatment of the diffusion and osmotic pressure in plants. The treatment of the whole subject is clear and concise, and forms an admirable addition to the literature of physiological botany. It will be found indispensable to all students along these lines."—*Plant World.*

A Laboratory Guide in Bacteriology. By PAUL G. HEINEMANN. vii+143 pp., 12mo, cloth; net, $1.50; postpaid, $1.67.

A Laboratory Outline of Physiological Chemistry. By RALPH W. WEBSTER and WALDEMAR KOCH. viii+107 pp., 8vo, cloth; net, $1.50; postpaid, $1.68.

Reprints from the Publications of the Alembic Club. The University of Chicago Press is the sole American agent for these publications. The complete series is carried in stock. For details, send for Catalogue.

Lectures on the Calculus of Variations

By OSKAR BOLZA, Ph.D.

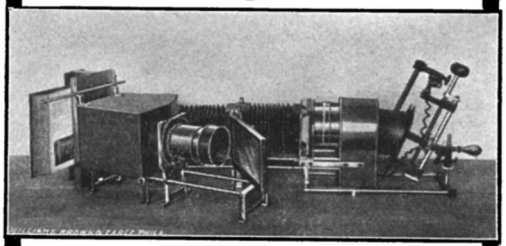
Of the Department of Mathematics in the University of Chicago

$4.00, net; $4.16, postpaid

The University of Chicago Press

CHICAGO and 156 Fifth Avenue NEW YORK

The New Reflecting Lantern



For showing on the screen opaque objects, book illustrations, engravings, and lantern slides.
It is the most perfect instrument of its kind.
It has a detachable Book-Holder.
It concentrates all light on the object.
It shows printed matter correctly.

Direct Vision Spectroscopes
Diffraction Gratings

Especially arranged for educational use. We can import these duty free at extremely low prices.

Wireless Telegraph Outfits

For school room and experimental work. Complete sending and receiving stations.

Lantern Slides—Microscopic Slides

Illustrating Botany, Geology and other sciences. Lists on application.

Dept. 26, 918 Chestnut Street, Philadelphia, Pa.

Methods in Plant Histology

BY CHARLES J. CHAMBERLAIN, A. M., Ph. D.
Instructor in Botany in the University of Chicago

SECOND EDITION ILLUSTRATED PRICE $2.25 NET, $2.39 POSTPAID

This book contains directions for collecting and preparing plant material for microscopic investigation. It is based upon a course in botanical microtechnique and is the first complete manual to be published on this subject. It is the result of several years' work with classes in residence at the University of Chicago and with University Extension classes away from the University. It aims, therefore, to meet the requirements not only of the student who has the assistance of an instructor in a fully equipped laboratory, but, also, the student who must work by himself and with limited apparatus. Free hand sectioning, the paraffin method, the collodion method, and the glycerine method are treated in considerable detail. In later chapters specific directions are given for making such preparations as are needed by those who wish to study the plant kingdom from the Algae up to the flowering plants. Special attention is paid to the staining of karyokinetic figures, because the student who masters this problem will find little difficulty in differentiating other structures. Formulas are given for the reagents commonly used in the Histological Laboratory.

For Sale by Dealers, or by the Publishers

ANIMAL MICROLOGY

PRACTICAL EXERCISES IN MICROSCOPICAL METHODS

By
MICHAEL F. GUYER
Professor of Zoology in The University of Cincinnati

An indispensable book for teacher, physician, student, or novice who wishes to learn how to prepare his own material for microscopical examination. There are special chapters on the preparation and examination of embryological material, blood, bacteria, and objects of general interest, and on the collection and preparation of material for the microscopical work in a course in elementary zoology. In an appendix nearly three hundred tissues and organs with directions for properly preparing them for microscopical study are tabulated. Sufficient account of the theoretical side of microscopy is given to enable the student to get satisfactory results from his microscope.

250 pp., 8vo; net $1.75, postpaid $1.88

Quantitative Classification of Igneous Rocks

Based on Chemical and Mineral Characters

With an Introductory Review of the Development of Systematic Petrography in the Nineteenth Century

By WHITMAN CROSS, JOSEPH P. IDDINGS, LOUIS V. PIRSSON, and HENRY S. WASHINGTON

THE BOOK presents in detail the new system of classification and nomenclature proposed by the authors. It contains a series of tables to aid in the calculation of mineral and chemical compositions of rocks, and a glossary of the new terms employed in the nomenclature. Having traced the development of petrography during the past century, the authors discuss the defects of the present system of classification, the basis on which a proper classification must be made, and the construction of the system proposed. The new nomenclature is then presented in full, including magmatic and rock names; and the last part of the book is devoted to methods of calculation, the tables, and the glossary. The book answers a need widely felt among petrologists in the last few years for a new petrographic system into which could be fitted the recent large additions to our knowledge of rocks.

286 pp., 8vo, cloth, net, $1.75; postpaid, $1.91.

A Contribution to the Theory of Glacial Motion

By THOMAS CHROWDER CHAMBERLIN
Head Professor of Geology in the University of Chicago

A SHORT treatise in which are discussed (1) the growth and constitution of a glacier; (2) the arrangement of the crystalline axes; (3) glacial temperatures; (4) the probable fundamental element in glacial motion; (5) auxiliary elements; (6) corroborative phenomena. There are appended a bibliography and twelve half-tone illustrations.

19 pp., 4to, paper, net, 50 cents; postpaid, 53 cents.
